Traditional
Railings
is Clear!**

ClearView Glass Railings Pros

Unlike hardwoods, glass railings don't need repeated painting or finishing for enhancing their durability. ClearView Glass Railings use large panels of glass fixed with 316 stainless steel solid core spigots. Neither glass nor the 316 stainless steel solid core spigots corrode when exposed to water. ClearView Glass Railings are made from 1/2" tempered glass panels. This is a specially manufactured type of glass, offering amazing durability. Unlike ordinary glass, tempered glass does not shatter even if it is cracked.

Design Versatility

Because glass appears neat and finished, it is one of the only porch railing systems that can incorporate multiple design elements without looking cluttered or hodgepodge. This gives you more versatility and options when it comes to the actual design of your outdoor space.

Durability

Most glass railings are made from one-quarter inch thick tempered glass. ClearView Glass Railings are made with 1/2" thick tempered glass with safety edge (shown right center) and have been tested to a strength of withstanding 13,800 pounds of impact per square inch!

Easy Maintenance

"You have to clean glass all the time." I hear this a lot and it drives me a little nuts. Glass isn't the annoying pain in the neck that some people make it out to be. Glass railings require very little maintenance. Typical cleaning intervals is every 2 or 3 years.

Cleaning glass deck railings can be as simple as wiping the glass down with a squeegee or spraying it with a hose. Another great aspect of ClearView Glass Railings is that almost everything—including those marker scribbles from your two-year-old—can be cleaned off glass without damaging the surface.

Value

Clear View Glass Railings (tempered glass)				
Panel Width	Panel Height	Thickness	Solid Core Spigots	Cost (Single Panel + Two Spigots)
5' Wide	39.37"	1/2"	2 x 316 Higher Quality*	Similar cost to lower quality product.
Competition (tempered glass)				
Panel Width	Panel Height	Thickness	Hollow Core Spigots	Cost (Single Panel + Two Spigots)
5' Wide	36"	1/4" or 3/8"	2 x 304 Standard*	\$1,100 - \$1,250

We just built a beautiful new home on the St Croix River with ClearView Glass Railings on all of our decks. When friends come to visit they walk right out to the deck and say "Wow! There is no disruption of your river view!" ClearView Glass Railings are many times the highlight of the home.

***ClearView Glass Railings 316 stainless steel solid core spigots are suitable for salt water installations. Less expensive 304 stainless steel spigots will corrode in salt water environment as well as areas with air pollution and rain pollution.**
