

The Difference from Traditional Railings is Clear!

ClearView Glass Railings Pros

Unlike hardwoods, glass railings don't need repeated painting or finishing for enhancing their durability. ClearView Glass Railings use large panels of glass fixed with 316 stainless steel solid core spigots. Neither glass nor the 316 stainless steel solid core spigots corrode when exposed to water.

Durability

CVGR 60" Full Width **Hercules** Panels are 1/2" thick, laminated and tempered glass. They are test proven to hold an amazing 2,520# vertical load and a 820# horizontal load. CVGR Variable Width Panels are superior 1/2" thick, tempered glass. They are test proven to hold a 300# vertical load, a 300# horizontal load and withstand 300# of impact.

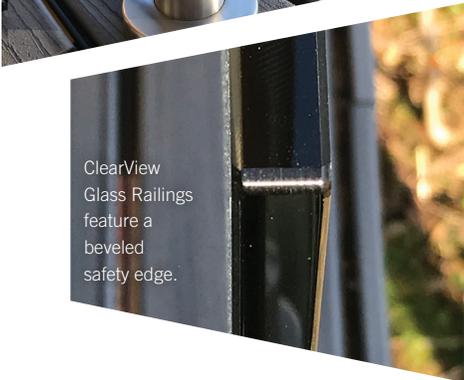

We just built a beautiful new home on the St Croix River with ClearView Glass Railings on all of our decks. When friends come to visit they walk right out to the deck and say "Wow! There is no disruption of your over view!" The ClearView Glass Railings are many times the highlight of the home.

Design Versatility

Because glass appears neat and finished, it is one of the only porch railing systems that can incorporate multiple design elements without looking cluttered or hodgepodge. This gives you more versatility and options when it comes to the actual design of your outdoor space.

Awesome! That sums it up! ClearView Glass Railings are simply awesome! 100% view from our deck with nothing to block our view. Clean, crisp, maintenance free. Absolutely love them!

ClearView Glass Railings feature a beveled safety edge.

Value

Clear View Glass Railings Hercules Glass

Panel Width	Panel Ht.	Thickness	Solid Core Spigots	Cost (Single Panel + Two Spigots)
Full Width 5' Wide	39.37" (Finished Railing Height is 42")	1/2" Laminated AND Tempered	2 x 316 Higher Quality*	Lower cost versus lower quality competition.

Competition (tempered glass)

Panel Width	Panel Ht.	Thickness	Hollow Core Spigots	Cost (Single Panel + Two Spigots)
5' Wide	36"	1/4" or 3/8"	2 x 304 Standard*	\$1,250 - \$1,400

Easy Maintenance

"You have to clean glass all the time." I hear this a lot and it drives me a little nuts. Glass isn't the annoying pain in the neck that some people make it out to be. Glass railings require very little maintenance, typical cleaning intervals is every 2 or 3 years.

Cleaning glass deck railings can be as simple as wiping the glass down with a squeegee or spraying it with a hose. Another great aspect of ClearView Glass Railings is that almost everything—including those marker scribbles from your two-year-old—can be cleaned off glass without damaging the surface.

***Clear View Glass Railings 316 stainless steel solid core spigots are suitable for salt water installations. Less expensive 304 stainless steel spigots will corrode in salt water environment as well as areas with air pollution and rain pollution.**

Love....Love....Love these. It makes my view of the river so much better, Clear View Glass Railings are just incredible!
