

**ClearView**  
GLASS RAILINGS

**The  
Difference  
from  
Traditional  
Railings  
is Clear!**

# ClearView Glass Railings Pros

Unlike hardwoods, glass railings don't need repeated painting or finishing for enhancing their durability. ClearView Glass Railings use large panels of glass fixed with 316 stainless steel solid core spigots. Neither glass nor the 316 stainless steel solid core spigots corrode when exposed to water.

Because glass appears neat and finished, it is one of the only porch railing systems that can incorporate multiple design elements without looking cluttered or hodgepodge.

This gives you more versatility and options when

it comes to the actual design of your outdoor space.

## Durability

CVGR 60" Full Width **Hercules** Panels are 1/2" thick, laminated and tempered glass. They are test proven to hold an amazing 2,520# vertical load and a 820# horizontal load. CVGR Variable Width Panels are superior 1/2" thick, tempered glass. They are test proven to hold a 300# vertical load, a 300# horizontal load and withstand 300# of impact.

## Easy Maintenance

"You have to clean glass all the time." I hear this a lot and it drives me a little nuts. Glass isn't the annoying pain in the neck that some people make it out to be. Glass railings require very little maintenance. Typical cleaning intervals is every 2 or 3 years.

Cleaning glass deck railings can be as simple as wiping the glass down with a squeegee or spraying it with a hose. Another great aspect of ClearView Glass Railings is that almost everything—including those marker scribbles from your two-year-old — can be cleaned off glass without damaging the surface.

## See the Difference

## Value

### Clear View Glass Railings Hercules Glass

Panel Width	Panel Height	Finished Railing Height	Thickness	Solid Core Spigots	Cost (Single Panel + Two Spigots)
5' Wide	39.37"	42"	1/2" Laminated AND Tempered	2 x 316 Higher Quality*	Lower cost versus lower quality product.

### Competition (tempered glass)

Panel Width	Panel Height	Thickness	Hollow Core Spigots	Cost (Single Panel + Two Spigots)
5' Wide	36"	1/4" or 3/8"	2 x 304 Standard*	\$1,250 - \$1,400

We just built a beautiful new home on the St Croix River with ClearView Glass Railings on all of our decks. When friends come to visit they walk right out to the deck and say "Wow! There is no disruption of your river view!" ClearView Glass Railings are many times the highlight of the home.

ClearView Glass Railings feature a beveled safety edge.

316 Stainless Steel Solid Core Spigots with base cover (right).

**\*ClearView Glass Railings 316 stainless steel solid core spigots are suitable for salt water installations. Less expensive 304 stainless steel spigots will corrode in salt water environment as well as areas with air pollution and rain pollution.**
