

# Introducing The Lever Spigot

## *The Next Generation in Spigots by ClearView Glass Railings™*

**EASIER INSTALLATION • NEW SLEEK DESIGN •  
GREATER CORROSION RESISTANCE MATERIAL**

Now Made from **Duplex Stainless Steel 2205**

- **STRONGER** than 316 Stainless Steel
- **GREATER PROTECTION** from salt water corrosion than 316 Stainless Steel

### **NEW SLEEK DESIGN** Featuring the **CVGR Lever Latch**

- **EASIER INSTALLATION:** Eliminates the need for tools when installing CVGR Glass Panels into spigots
- **SLEEK NEW DESIGN:** Eliminates unsightly set screws
- **CONFIDENCE:** No risk of over-tightening or under-tightening of glass panel in spigot channel
- **DURABILITY:** Greater protection from salt water corrosion than 316 Stainless Steel
- **STRENGTH:** Stronger material than 316 Stainless Steel

---

## **The Differences Between Duplex Stainless Steel 2205 and 316 Stainless Steel**

- The yield strength of Duplex Stainless Steel 2205 is one time higher than 316 Stainless Steel.
- Duplex Stainless Steel 2205 performs excellent on stress corrosion resistance, especially when it is used in the marine environment containing chloride ions.
- In both dynamic or static load conditions, Duplex Stainless Steel 2205 has a higher energy absorption capacity than 316 Stainless Steel.
